ADVISORY / LEADERSHIP / TALENT

Progress starts with people.

Practical advisory, executive leadership, and talent support for healthcare organizations and growing businesses.

1

Technology, Operations & AI Advisory

When you need a clear plan, a better workflow, or a smarter technology decision.

Digital & AI strategy: Build a prioritized roadmap connecting business goals, technology investments, and practical AI opportunities.

Vendor selection: Define requirements, compare solutions, structure demos, and support a clear selection process.

Vendor management: Review performance, clarify service expectations, and prepare for renewals or difficult vendor conversations.

Workflow improvement: Find bottlenecks and reduce handoff friction before adding another system or automation.

2

Fractional & Interim Leadership

When growth, a leadership gap, or competing priorities calls for experienced direction.

Fractional CIO support: Guide technology priorities, budgets, and teams during rapid growth without a full-time executive role.

Leadership transitions: Provide interim direction during staffing changes, executive searches, or a new leader's onboarding.

Leadership workshops: Align leaders on priorities, decision ownership, and the people and process changes needed for execution.

Execution oversight: Establish a practical cadence for decisions, risks, and accountability across major initiatives.

3

Talent & Delivery Support

When the plan is clear but the team needs more capacity or a specific capability.

Specialist talent: Define role requirements and identify technology, operations, or project talent for the work ahead.

Project capacity: Add hands-on coordination and delivery support for implementations, expansions, or competing deadlines.

Change & adoption: Support stakeholder communication, rollout planning, and training coordination for a new way of working.

Transition & handoff: Document workflows, clarify responsibilities, and transfer knowledge as teams or systems change.

Let's talk about what needs to move forward.
